PROFESSIONAL SUMMARY

MCA student specializing in AI, Machine Learning and Data Science with hands-on experience building Python-powered AI applications. Proficient in FastAPI, NLP pipelines, supervised/unsupervised ML, and React.js frontends. Skilled at building secure REST APIs, integrating AI models, and engineering scalable backend systems. Seeking a fresher role as Python Developer, AI Engineer, or NLP Developer in Bengaluru.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
AI / ML: Machine Learning, NLP, Supervised & Unsupervised Learning
Frameworks: FastAPI, React.js
NLP Libraries: NLTK, spaCy, Scikit-learn, Transformers
Databases: MongoDB, MySQL
API & Auth: REST API Development, JWT Authentication
Tools: Git, GitHub, Postman, VS Code
Concepts: Text Classification, Tokenization, Feature Extraction, Data Analysis

PROJECTS

Cloud PDF AI Management System | Python, FastAPI, React.js, NLP, JWT, MongoDB

- Architected a secure AI-powered PDF management platform using FastAPI and React.js for intelligent document upload, retrieval, and processing.
- Implemented JWT-based authentication with REST API security controls for protected document upload/download.
- Engineered an NLP pipeline for automated PDF text extraction and abstractive summarization.
- Integrated an AI voice explanation module converting extracted text to audio for accessibility.

AI Paragraph Analysis System | Python, NLP, Machine Learning, REST API

- Built an NLP text-analysis platform using supervised classification and unsupervised clustering.
- Implemented multilingual voice explanation via AI text-to-speech for real-time content analysis.
- Designed scalable REST APIs for AI model inference and real-time text analysis from frontend clients.
- Applied tokenization, TF-IDF feature extraction, and model optimization to maximize accuracy.

Resume Generator System | Python, FastAPI, React.js, REST API

- Developed a dynamic, template-driven resume generation platform with FastAPI backend and React.js frontend.
- Built RESTful APIs for user data ingestion, template rendering, and PDF export for multi-user use.

ML Text Classification Project | Python, Scikit-learn, NLP, Data Analysis

- Implemented supervised learning (Naive Bayes, SVM, Logistic Regression) for multi-class text classification.
- Applied unsupervised clustering (K-Means) for pattern discovery in unstructured datasets.
- Executed a full NLP preprocessing pipeline: tokenization, lemmatization, stopwords removal, TF-IDF.

EDUCATION

Master of Computer Applications (MCA) - AI, ML & Data Science | S-VYASA Deemed to be University, Bengaluru (Pursuing) 2025-2027

Bachelor of Computer Applications (BCA) | Don Bosco College, Dharmapuri | 2022 - 2025

Certifications

- Oracle Cloud Infrastructure for Sunbird Ed Specialty – Oracle
- March 12, 2025

SOFT SKILLS

Problem-Solving, Fast Learner, Team Collaboration, Analytical Thinking, Attention to Detail, Communication
